SCC-2000F Full automatic online film winding machine

**Product description:**

The on-line winding packer is a packing machine for the assembly line operation. It is very suitable for the needs of automatic packaging of modern enterprises. It plays a very positive role in improving the effect of packaging, reducing labor intensity and using human resources effectively. It can be equipped with automatic film mulching machine to achieve all-round wrapping. It has been widely used in chemical, electronic, food, beverage and paper industries.

Adopt PLC programmable controller and man-machine conversation touch screen.

Unmanned operation, automatic feeding, upper membrane, winding, cutting film, film sticking and discharging.

Automatic warning, automatic fault alarm and so on;

The operation is simple, the performance is stable and durable.

**technical parameter:**

Product model	SCC-2000F
Minimum packing diameter	800mm
Maximum packing diameter	2500mm
Minimum packing length	600mm
Maximum packing length	3400mm
Packaging material specification	500x0.017-0.025(mm)LLDPE
Packaging speed	0-20Turn / divide
Power / voltage	1Kw/380V/50Hz
Machine size	L6700 x W5800 x H3300mm
